

Mass Ghazawi

Healthcare Data Analyst | SQL | Power BI | Python | MD

✉ masa.949596@gmail.com 📞 +972528235050 📍 Qalanswa, Israel, 4060000 Israel

Profile

Medical Doctor (MD) transitioning into Healthcare Data Analytics with hands-on experience in SQL, Power BI, Excel, and Python.

Developed healthcare analytics projects involving patient readmission analysis, hospital operations dashboards, and clinical data exploration.

Strong combination of medical knowledge and analytical skills with a passion for transforming healthcare data into actionable insights that support decision-making and improve patient outcomes.

Seeking an opportunity as a Healthcare Data Analyst, Clinical Data Analyst, or Junior Data Analyst to contribute to data-driven healthcare solutions.

Education

Doctor of Medicine (MD) Sep 2013 – Jul 2020
V. N. Karazin Kharkiv National University, Kharkiv, Ukraine

Employment

Public Transportation Quality Inspector Nov 2023 – Present
Employer Public Transportation Monitoring Project

- Conducted field inspections of public transportation services and vehicles.
- Verified schedule compliance, vehicle condition, and service quality standards.
- Documented operational issues and violations using a digital reporting system.
- Prepared inspection reports with photos and observations for regulatory review.

Courses

- SQL for Data Analysis
- Power BI for Data Analytics
- Excel for Data Analysis
- Python for Data Analytics
- Data Analysis & Visualization

English

Projects

Healthcare Predictive Analytics

Python | Pandas | SQL | Power BI

- Performed healthcare data cleaning and preprocessing using Python and Pandas.
- Conducted exploratory data analysis to identify patient risk patterns and healthcare trends.
- Applied statistical analysis and data visualization techniques to generate actionable insights.
- Developed reports and dashboards to support data-driven healthcare decision-making.

Diabetic Patient Readmission Analysis

SQL & Power BI

- Analyzed over 200,000 healthcare records to identify patient readmission patterns.
- Developed SQL queries for risk factor analysis and patient segmentation.
- Built an interactive Power BI dashboard with KPIs and visual insights.
- Generated recommendations to support hospital decision-making.

Hospital Management Dashboard

SQL & Power BI

- Designed a hospital analytics dashboard tracking admissions, billing, diagnoses, and medications.
- Created KPI metrics and interactive reports using Power BI.
- Utilized SQL joins and aggregations to analyze hospital performance.

Heart Disease Analysis

Excel & SQL

- Conducted exploratory analysis on cardiovascular risk factors
- Identified relationships between cholesterol, age, and heart disease occurrence.
- Built reports and visualizations to support healthcare insights.

Qualities

- Analytical Thinking
- Problem solving
- Attention to detail
- Fast Learner
- Communication Skills
